UPSTREAM - HOW WE CAN HELP OUR ENGINEERING HERITAGE

Since 2005, Leader Engineering has been supporting upstream operations around the globe. Over the years our people have made key contributions to drilling, completions and well intervention projects across Africa, North America and Asia.

Indeed, upstream is part and parcel of the Leader heritage. We've been involved in the sector since the 1970s, when founder Grahame Roberts took his first steps into the international oil and gas industry.

It was a career that began in the newly-formed United Arab Emirates and ultimately took him as far afield as Algeria, Pakistan and Canada.

And it was whilst working in Nigeria on the Erha project in 2005 that he established Leader Engineering. Having helped bring a number of colleagues into the project, he set up the

business primarily to fulfil the administrative functions that come with working as a contractor. It was the start of an industry success story.

Since then, Leader has developed into a dedicated and professional energy recruitment company: a family-run business founded upon Grahame's skills and experience in representing former colleagues from all over the world

That's why clients are turning to us. Today they enjoy the confidence that comes with knowing the personnel working for them are Leader people.

INTELLIGENT RECRUITMENT. SIMPLIFIED.

OUR UPSTREAM CAPABILITIES

WHY WORK WITH US?

INTELLIGENT RECRUITMENT. SIMPLIFIED. This statement underpins everything we do: finding world-class, qualified talent that is ready to contribute to your operations immediately. This may be a simple objective but in practice it is an incredibly complicated challenge. For over 10 years the Leader family has been committed to delivering this promise.

HOW WE WORK

1. REPUTATION

Firstly, our reputation is everything to us. It defines who we are and the work we do. We take every possible step to ensure our industry standing – and your operations – are not compromised.

4. NETWORKING

We take advantage of the extensive network that we've developed over the years to ensure that the personnel supplied by Leader Engineering are of the highest calibre.

2. TECHNICAL APTITUDE

For us, training is a top priority. Be assured that your contacts at Leader understand engineering principles. They appreciate your everyday challenges. They know the questions to ask and the qualifications required.

5. ULTIMATE OBJECTIVE

Our goal is always to provide a colleague that joins your operations fully accredited and ready to make a positive contribution immediately. We have the experience, the resources and the passion to make sure that's the case.

3. THE CANDIDATE

Once we've identified a candidate that meets our stringent specifications, our job is only beginning. We work painstakingly to understand each career move; to gain an insight into their personal attributes and technical competence.

SIMPLICITY

We instil clarity in everything we do, removing bureaucracy and eliminating obstacles that could delay mobilisation. We constantly refine all our activities, from recruitment processes to immigration procedures.

THE DISCIPLINES WE SUPPORT

- > Drilling Managers
- > Completions Engineers/Supervisors
- > Well Interventions Engineers
- > Cementing Specialists
- > Drilling Superintendents
- > Subsea Supervisors
- > Well Test Engineers/Supervisors
- > Directional Drillers
- > Drilling Engineers/Supervisors
- > Well Services Supervisors
- > Drilling Fluids Engineers
- > Reservoir & Production Engineers
